Dr. Hui Wei, M.D.,

I want to thank you for the effective treatment of my frozen shoulder.

Before I came to you, I had been treated by an Orthopedic Surgeon who tried physical therapy without any improvement. Another Orthopedic Surgeon gave me a Cortisone shot into my shoulder that was extremely painful but ineffective.

I wanted to try acupuncture, so I found two individuals who advertised acupuncture treatments. Neither one was helpful, but I still believed that acupuncture could help me.

My neighbor put me in contact with you. After the third acupuncture treatment, I discovered that I could reach out to the bank drive through window – something that I hadn't been able to do for over six months. My shoulder continued to improve and I recovered full use of it. Your patience and understanding was also an important part of my therapy.

Thank you for helping me recover.
